EDUCATION

Monash University Expected Dec 2028
Bachelor of Commerce and Bachelor of Information Technology (Double Degree) *Melbourne, VIC*

- **Majors:** Software Development, Actuarial Studies. **Relevant Coursework:** Programming (Python, C#), Web Development Fundamentals, Business Statistics.

EXPERIENCE

Constance: Co-founder, Product and Technology Lead Oct 2026 – Present
Melbourne healthtech supporting people in the weeks between hospital discharge and recovery at home | *constancehealth.au*

- Won **1st of ~60 students** at the **Startmate Student Founder Bootcamp** after forming the team and validating the problem in 36 hours with a cardiologist, a surgeon and a health insurer.
- Built the product demo: an **AI text companion** for people recovering from heart disease that answers only from their own discharge plan, plus a **clinician dashboard** (Next.js, TypeScript, Cloudflare Workers, OpenAI API).
- Rebuilt the product to **stay outside Therapeutic Goods Administration (TGA) medical device rules**, with fixed emergency messaging, plan citations on every answer and adversarial testing against prompt injection.
- Designed the **production architecture on AWS Sydney** for Australian health data residency (Claude on Amazon Bedrock, ECS, RDS Postgres, Cognito).

PROJECTS

Watchlist: Personal Film Tracker with an AI Taste Profile Sep 2026
Next.js, TypeScript, Supabase (Postgres, Auth), Claude API, Vitest, Playwright | *watchlist-ashen-ten.vercel.app*

- Built a **Letterboxd-style tracker** with film search, a to-watch list, ratings, viewing stats and an **AI taste profile** that recommends films based on what you have rated.
- Added following, a friends feed and a taste-match score, with **database row-level security** so people only see data from accounts they follow.

Vacationer: Australian Internship and Graduate Role Tracker Jul 2026
Next.js, Tailwind CSS, Claude API, GitHub Actions | *vacationer-tracker.vercel.app*

- Shipped a free tracker of **36 curated Australian programs** sorted by closing date, with a **weekly automated pipeline** on GitHub Actions that re-verified every listing with the Claude API and auto-deployed updates, unattended since July.

LEADERSHIP & ACTIVITIES

Monash Association of Coding (MAC): Projects Officer Oct 2026 – Present

- Building open-source tools used by **1,500+ Monash students**, including the MPLOY jobs board and MonMap course planner, with full-stack work in TypeScript (Next.js, PostgreSQL) shipped through code review and CI.

Beta Alpha Psi (BAP), Xi Epsilon Chapter: Competitions Director Sep 2026 – Present

- Leading a **5-person Competitions team**, after co-designing CLUE-dit, a forensic accounting investigation event built from 25 evidence documents and 6 interview scripts.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, C#, HTML/CSS
- **Frameworks & Testing:** Next.js, React, FastAPI, Streamlit, Vitest, Playwright
- **Cloud & Data:** AWS, Cloudflare Workers, Supabase, PostgreSQL, Vercel, GitHub Actions, Docker
- **AI & Large Language Models (LLMs):** Claude and OpenAI APIs, Vercel AI SDK, function calling, Whisper

HONORS & AWARDS

- **1st Place:** Startmate Student Founder Bootcamp, top pitch of ~60 students, won **$15,000 in OpenAI credits**, 2026
- **7th of 155 and First-Timer Award:** Sophiie AI Agents Hackathon, for a voice-to-quote AI assistant built solo in 33 hours, 2026
- **Best Pitch:** Australian Grand Prix Corporation (AGPC) Hackathon, 2026
- **Best Pitch:** Canva Hackathon (Monash), 2026
